EXECUTIVE SUMMARY

I am a student majoring in Informatics Engineering with experience as a programmer during my internship. Throughout the internship, I have developed websites using React and Tailwind. I have strong technical skills in HTML, CSS, JavaScript, Next.js, and version control platforms. In addition to that, I possess soft skills in teamwork, effective collaboration, logical and methodical thinking, as well as good analytical and creative abilities. Apart from the technological field, I am also interested in UI/UX design and creativity.
